Cephalalgia 1995;15. Oslo. ISSN 0333-1024

Subject index

acetylsalicylic acid
Low-dose ibuprofen in self-medication of mild to moderate headache: a comparison with acetylsalicylic acid and placebo, 531
apomorphine
Transcranial Doppler ultrasound in migraine and tension-type headache after apomorphine administration double-blind crossover versus placebo study, 399
arteriovenous malformation
Initially migraine-like manifestation of a ruptured spinal arteriovenous malformation, 237
aspirin
The effects of aspirin on the CNV in healthy individuals, 129
autonomic nervous system
Sympathetic-parasympathetic activation during spontaneous attacks of cluster headache: evaluation by spectral analysis of heart rate fluctuations, 504
basilar migraine
Is familial hemiplegic migraine a hereditary form of basilar migraine? 477
behaviour
Psychosocial and behavioral characteristics in chronic headache patients: support for a continuum and dual-diagnostic approach, 216
Brown-Sequard
Brown-Sequard's comment on Du Bois-Reymond's "hemikrania sympathicotonica", 370
cerebral blood vessels
Modification of vasoconstrictor responses in cerebral blood vessels by lesioning of the trigeminal nerve: possible involvement of CGRP, 373
cerebral circulation
Neuropeptides in the cerebral circulation: relevance to headache, 272
cerebrospinal fluid
Cerebrospinal fluid analyses in migraine patients and controls, 489
cerebrovascular disease
Headache in lacunar stroke, 410
Migraine and stroke in childhood and adolescence, 26
cervicogenic headache
Diagnostic value of C2–3 instantaneous axes of rotation in patients with headache of cervical origin, 391
Cervicogenic headache, 463
CGRP
Modification of vasoconstrictor responses in cerebral blood vessels by lesioning of the trigeminal nerve: possible involvement of CGRP, 373
chronic daily headache
Cross-correlation between stress, pain, physical activity, and temporalis muscle EMG in chronic daily temporalis-region headache, 511
Classification of chronic daily headache by International Headache Society criteria: limits and new proposals, 37
classification
Headache in lacunar stroke, 410
Classification of chronic daily headache by International Headache Society criteria: limits and new proposals, 37
Headache classification and the Bible: Was St Paul's thorn in the flesh migraine? 180
clinical trials
Guidelines for trials of drug treatment in tension-type headache. First edition: International Headache Society Committee on Clinical trials, 165
Guidelines for controlled trials of drugs in cluster headache, 452
clonidine
Efficacy of transdermal clonidine in short-term treatment of cluster headache: a pilot study, 430
cluster headache
Twenty-four-hour melatonin and cortisol plasma levels in relation to timing of cluster headache, 224
Cluster headache attacks treated for up to three months with subcutaneous sumatriptan (6 mg), 230
Migraine and cluster headache—their management with sumatriptan: a critical review of the current clinical experience, 337
Migraine, chronic tension type and cluster headache in an Ethiopian rural community, 482
cluster headache—pathogenesis
The effects of increasing the intracranial blood volume in cluster headache patients and controls, 499
cluster headache symptoms—pathogenesis
Twenty-four-hour melatonin and cortisol plasma levels in relation to timing of cluster headache, 224
Sympathetic-parasympathetic activation during spontaneous attacks of cluster headache: evaluation by spectral analysis of heart rate fluctuations, 504
cluster headache-treatment
Cluster headache attacks treated for up to three months with subcutaneous sumatriptan (6 mg), 230
Migraine and cluster headache—their management with sumatriptan: a critical review of the current clinical experience, 337
Efficacy of transdermal clonidine in short-term treatment of cluster headache: a pilot study, 430
Guidelines for controlled trials of drugs in cluster headache, 452
contingent negative variation
Continent negative variation during migraine attack and interval: evidence for normalization of slow cortical potentials during the attack, 123
A Danilov: The effects of aspirin on the CNV in healthy individuals, 129
controversy
Migraine with aura and migraine without aura: one entity, two or more? 182
Migraine with aura and migraine without aura are two different entities, 183
Migraine with aura and migraine without aura are not different entities, 186
cortisol
Twenty-four-hour melatonin and cortisol plasma levels in relation to timing of cluster headache, 224

critical flicker fusion test
Responses to temporal visual stimuli in migraine: the critical flicker fusion test, 396
Du Bois Reymond
Brown-Sequard's comment on Du Bois-Reymond's "hemikrania sympathicotonica", 370
Eagle's syndrome
Elongated styloid process and Eagle's syndrome, 80
EMG
Cross-correlation between stress, pain, physical activity, and temporalis muscle EMG in chronic daily temporalis-region headache, 511
epidemiology
Migraine headaches in adolescents: a student population-based study in Monreale, 5
Diagnosis of headache in childhood and adolescence: a study in 437 patients, 13
Epidemiology of headache, 45
evoked potentials
Non-invasive trigeminal evoked potentials: normative aging data, 147
glutamate
Platelet and plasma levels of glutamate and glutamine in migraine with and without aura, 132
guidelines
Guidelines for controlled trials of drugs in cluster headache, 452
handedness
Migraine, tension headache and left-handedness, 145
headache—clinical
Psychosocial and behavioral characteristics in chronic headache patients: support for a continuum and dual-diagnostic approach, 216
Headache in lacunar stroke, 410
headache epidemiology
Migraine trigger factors in a non-clinical Mexican-American population in San Diego county: implications for etiology, 523
Migraine, chronic tension type and cluster headache in an Ethiopian rural community, 482
headache—pathogenesis
Convergence of afferents from superior sagittal sinus and tooth pulp on cells in the thalamus of the cat, 191
Neuropeptides in the cerebral circulation: relevance to headache, 272
Experimental headache in humans, 281
Modification of vasoconstrictor responses in cerebral blood vessels by lesioning of the trigeminal nerve: possible involvement of CGRP, 373
headache–treatment
Low-dose ibuprofen in self-medication of mild to moderate headache: a comparison with acetylsalicylic acid and placebo, 531
hemikrania sympathicotonica
Brown-Sequard's comment on Du Bois-Reymond's "hemikrania sympathicotonica", 370
herpes zoster
Syncope and seizure-like activity secondary to acute herpes zoster infection of the trigeminal nerve, 241
ibuprofen
Low-dose ibuprofen in self-medication of mild to moderate headache: a comparison with acetylsalicylic acid and placebo, 531
magnetic resonance
Magnetic resonance spectroscopy in migraine, 323
melatonin
Nocturnal melatonin excretion is decreased in patients with migraine and without aura attacks associated with menses, 136
Twenty-four-hour melatonin and cortisol plasma levels in relation to timing of cluster headache, 224
menstrual migraine
Nocturnal melatonin excretion is decreased in patients with migraine without aura attacks associated with menses, 136
Sex-hormone-related events in migrainous females. A clinical comparative study between migraine with aura and migraine without aura, 140
Changes of neuroendocrine axes in patients with menstrual migraine: a brief review, 297
migraine
Migraine headaches in adolescents: a student population-based study in Monreale, 5
Effect of age on the fulfilment of the IHS criteria for migraine in children at a headache clinic, 404
Migraine patients experience poorer subjective well-being/quality of life even between attacks, 31
Initially migraine-like manifestation of a ruptured spinal arteriovenous malformation, 237
Migraine to the year 2000, 259
Neuroreceptor imaging by SPECT in migraine, 310
Is positron emission tomography a useful tool for studying migraine? 316
Migraine and cluster headache—their management with sumatriptan: a critical review of the current clinical experience, 337
Migraine: association with personality characteristics and psychopathology, 358
Transcranial Doppler ultrasound in migraine and tension-type headache after apomorphine administration: double-blind crossover versus placebo study, 399
Migraine, chronic tension type and cluster headache in an Ethiopian rural community, 482
migraine—clinical
Migraine patients experience poorer subjective well-being/quality of life even between attacks, 31
Dietary migraine: recent progress in the red (and white) wine story, 101
Sex-hormone-related events in migrainous females. A clinical comparative study between migraine with aura and migraine without aura, 140
Migraine, tension headache and left-handedness, 145
Initially migraine-like manifestation of a ruptured spinal arteriovenous malformation, 237
Migraine: association with personality characteristics and psychopathology, 358
Migraine trigger factors in a non-clinical Mexican population in San Diego county: implication for etiology, 523
migraine—genetics
Genetic markers: association study in migraine, 200
Is familial hemiplegic migraine a hereditary form of basilar migraine? 477
migraine—pathogenesis
The nitric oxide hypothesis of migraine and other vascular headaches, 94

$5HT_2$ receptors in cerebral cortex of migraineurs studied using PET and 18F-fluorosetoperone, 104
Cerebral blood flow velocities are reduced during attacks of unilateral migraine without aura, 109
Thresholds for detection of a target against a background grating suggest visual dysfunction in migraine with aura but not migraine without aura, 117
Continent negative variation during migraine attack and interval: evidence for normalization of slow cortical potentials during the attack, 123
Platelet and plasma levels of glutamate and glutamine in migraine with and without aura, 132
Nocturnal melatonin excretion is decreased in patients with migraine and without aura attacks associated with menses, 136
Platelet models and their possible usefulness in the study of migraine pathogenesis, 265
Neurogenic model of migraine, 277
Neuroreceptor imaging by SPECT in migraine, 310
Is positron emission tomography a useful tool for studying migraine? 316
Magnetic resonance spectroscopy in migraine, 323
Vasoactive peptide levels in the plasma of young migraine patients with and without aura assessed both interictally and ictally, 384
Transcranial Doppler ultrasound in migraine and tension-type headache after apomorphine administration: double-blind crossover versus placebo study, 399
Cerebrospinal fluid analyses in migraine patients and controls, 489

migraine—pediatric
Diagnosis of headache in childhood and adolescence: a study in 437 patients, 13
Migraine and stroke in childhood and adolescence, 26

migraine symptoms—pathogenesis
Responses to temporal visual stimuli in migraine: the critical flicker fusion test, 396

migraine—treatment
Assessment of peripheral vascular effects of antimigraine drugs in humans, 288
Migraine and cluster headache—their management with sumatriptan: a critical review of the current clinical experience, 337
Health-related quality of life under six months treatment of migraine—an open clinic-based longitudinal study, 414
Introduction of a novel self-injector for sumatriptan. A controlled clinical trial in general practice, 423
Response measures in the acute treatment of migraine, 519

migraine with aura
Thresholds for detection of a target against a background grating suggest visual dysfunction in migraine with aura but not migraine without aura, 117
Sex-hormone-related events in migrainous females. A clinical comparative study between migraine with aura and migraine without aura, 140
Migraine with aura and migraine without aura: one entity, two or more? 182
Migraine with aura and migraine without aura are two different entities, 183
Migraine with aura and migraine without aura are not different entities, 186

migraine without aura
Cerebral blood flow velocities are reduced during attacks of unilateral migraine without aura, 109
Thresholds for detection of a target against a background grating suggest visual dysfunction in migraine with aura but not migraine without aura, 117
Nocturnal melatonin excretion is decreased in patients with migraine without aura attacks associated with menses, 136
Sex-hormone-related events in migrainous females. A clinical comparative study between migraine with aura and migraine without aura, 140
Migraine with aura and migraine without aura: one entity, two or more? 182
Migraine with aura and migraine without aura are two different entities, 183
Migraine with aura and migraine without aura are not different entities, 186

neuroendocrine
The neuroendocrine challenge paradigm in headache research, 292
Changes of neuroendocrine axes in patients with menstrual migraine: a brief review, 297

neurogenic inflammation
Neurogenic model of migraine, 277

neuropeptides
Neuropeptides in the cerebral circulation: relevance to headache, 272

neurophysiology
Clinical neurophysiology and neurotransmitters, 301

neuroreceptor
Neuroreceptor imaging by SPECT in migraine, 310

neurotransmitters
Clinical neurophysiology and neurotransmitters, 301

nitric oxide
The nitric oxide hypothesis of migraine and other vascular headaches, 94

pain
Convergence of afferents from superior sagittal sinus and tooth pulp on cells in the thalamus of the cat, 191
Cross-correlation between stress, pain, physical activity, and temporalis muscle EMG in chronic daily temporalis-region headache, 511

pathogenesis
Increased cerebral blood flow velocity induced by cold pressor test in migraine: a possible basis for pathogenesis? 494

peptide
Sumatriptan and sensory peptide activity in subarachnoid hemorrhage: a hypothesis, 470

personality characteristics
Migraine: association with personality characteristics and psychopathology, 358

PET
$5HT_2$ receptors in cerebral cortex of migraineurs studied using PET and 18F-fluorosetoperone, 104

platelet
Platelet and plasma levels of glutamate and glutamine in migraine with and without aura, 132
Platelet models and their possible usefulness in the study of migraine pathogenesis, 265
Influence of a selective $5HT_1$-receptor agonist GR43175 on platelet responsiveness, 472
positron emission tomography
Is positron emission tomography a useful tool for studying migraine? 316
pressure-controlled palpation
Pressure-controlled palpation: a new technique which increases the reliability of manual palpation, 205
psychopathology
Migraine: association with personality characteristics and psychopathology, 358
quality of life
Migraine patients experience poorer subjective well-being/quality of life even between attacks, 31
Health-related quality of life under six months treatment of migraine—an open clinic-based longitudinal study, 414
seizure
Syncope and seizure-like activity secondary to acute herpes zoster infection of the trigeminal nerve, 241
serotonin
$5HT_2$ receptors in cerebral cortex of migraineurs studied using PET and 18F-fluorosetoperone, 104
SPECT
Neuroreceptor imaging by SPECT in migraine, 310
stress
Cross-correlation between stress, pain, physical activity, and temporalis muscle EMG in chronic daily temporalis-region headache, 511
subarachnoid hemorrhage
Sumatriptan and sensory peptide activity in subarachnoid hemorrhage: a hypothesis, 470
sumatriptan
Cluster headache attacks treated for up to three months with subcutaneous sumatriptan (6 mg), 230
Migraine and cluster headache—their management with sumatriptan: a critical review of the current clinical experience, 337
Introduction of a novel self-injector for sumatriptan. A controlled clinical trial in general practice, 423
Sumatriptan and sensory peptide activity in subarachnoid hemorrhage: a hypothesis, 470
Influence of a selective $5HT_1$-receptor agonist GR43175 on platelet responsiveness, 472
superior sagittal sinus
Convergence of afferents from superior sagittal sinus and tooth pulp on cells in the thalamus of the cat, 191
syncope
Syncope and seizure-like activity secondary to acute herpes zoster infection of the trigeminal nerve, 241
tension-type
Transcranial Doppler ultrasound in migraine and tension-type headache after apomorphine administration: double-blind crossover versus placebo study, 399
Migraine, chronic tension type and cluster headache in an Ethiopian rural community, 482
tension-type headache
Guidelines for controlled trials of drugs in cluster headache, 452
tension-type headache—clinical
Migraine, tension headache and left-handedness, 145
tension-type headache—pathogenesis
Transcranial Doppler ultrasound in migraine and tension-type headache after apomorphine administration: double-blind crossover versus placebo study, 399
transcranial Doppler
Cerebral blood flow velocities are reduced during attacks of unilateral migraine without aura, 109
Increased cerebrovascular pCO_2 reactivity in migraine with aura—a transcranial Doppler study during hyperventilation, 211
Transcranial Doppler ultrasound in migraine and tension-type headache after apomorphine administration: double-blind crossover versus placebo study, 399
Increased cerebral blood flow velocity induced by cold pressor test in migraine: a possible basis for pathogenesis? 494
trigger factors
Migraine trigger factors in a non-clinical Mexican-American population in San Diego county: implications for etiology, 523
vasoactive peptide
Vasoactive peptide levels in the plasma of young migraine patients with and without aura assessed both interictally and ictally, 384
vertigo
Paroxysmal vertigo as a migraine equivalent in children: a population-based study, 22
wine
Dietary migraine: recent progress in the red (and white) wine story, 101

Cephalalgia 1995;15. Oslo. ISSN 0333-1024
